# ABOUT US

Mikoto Elevators, an ISO 9001 - 2015 company continues to grow rapidly in the industry and we embrace every opportunity which fuels our continuously growing portfolio. We are proud to have several key personnel including senior management officials and technical experts who have previously been associated with various major players in the elevator industry.

Our state of the art elevator products offer superb performance, reliability as well as aesthetics and sophistication. We have a large range of specialised elevators to choose from, including elevators designed for Hospitals, Shopping Complexes, High Rise Buildings, Residential Houses as well as Vehicle Elevators and more.

Offering complete flexibility we can modify our products and design to meet our clients' needs and specifications from our wide range of products. Whether it's maintenance, modernisation or new installation you can depend on Mikoto to deliver quality services that will exceed expectations. We are also very passionate about maintaining and extending the life cycle of our customer's valuable assets.

# PRODUCTS

## PASSENGER ELEVATOR

Mikoto Elevators proudly presents an exclusive range of strongest and safest lifts in the passenger segment. Available with low headroom structure you will find pre-assembled passenger lifts ready for swift and inexpensive installation. From technical specification to installation, customer interaction and satisfaction are made sure. One of the major highlights of our passenger elevators is its energy efficiency while offering a fast and elegant product making sure that each ride is enjoyable as possible.

## SERVICE AND GOODS ELEVATOR

Mikoto Service and Goods lifts are manufactured for combined passenger and goods use and bridge the gap between commercial passenger lifts and fixed platform hoists. Within our goods lifts collection, you will find space saving installation options, self supporting galvanised steel structures and many more design features to make your transportation tasks less challenging and more secure.

## HOME ELEVATOR

We know that buying a home lift is often a 'once in a lifetime purchase', so choosing the right product is essential. Each Mikoto luxury elevator offers a low energy model with noiseless operating system and is available in a wide variety of high quality wood and metal finishes. Either you are looking for a discreet, minimal lift to assist you in your movement around the house or want us to provide a complicated glass lift solution, we have got the perfect solutions to suit your home elevator requirements.

## COMMERCIAL ELEVATOR

Any commercial space can be busy with people moving up and down the floors all day, sometimes carrying heavy or bulky objects. Engineered for safety and luxury, Mikoto commercial elevators are built to carry heavy loads and have a bigger cab size. Besides adding style to a commercial set up our customised commercial elevators utilise only lesser space with trouble free installation matched with little maintenance. This is one investment that will keep providing you dividends for decades.

## AUTOMOBILE ELEVATOR

Automobile elevators are designed for moving cars in showrooms, garages, flats, malls, homes and more. Installation of automobile elevators is a wise investment allowing significant space savings and design flexibility for Building Planners and Architects. Mikoto car elevators provide compact, easy to use basement or rooftop parking solutions at a fraction of a cost. Automobile elevators have lower average speeds, heavy load bearing capacity and are engineered for strainful day to day usage in a long run.

## HOSPITAL BED ELEVATOR

Throughout the day hundreds of patients, visitors, doctors, nurses and staff move between the floors from emergencies and surgeries to bedside care. Hospital elevator has to meet specific hygiene requirements and should provide access for people with different needs including wheelchairs.

Mikoto Elevators and Platform lifts meet the special needs of all types of hospitals and healthcare facilities. The depth of the cab of a hospital lift is sufficient to transport stretcher or hospital bed with attendant physician or health officer. The lift might have single or double entrances.

## INDUSTRIAL ELEVATOR

Mikoto Elevators introduces an innovative method of safe and reliable vertical transportation in industrial plants and construction sites. Ideal for vertically transporting both materials and personnel in elevated work sites, our secure and reliable construction hoists eliminate the need for separate personnel and materials elevators. We offer single and dual cab construction elevators. We manufacture several types of hoists including personnel and material hoists. Mikoto elevators provides temporary construction hoists and elevators that allow general contractors to increase productivity and improve safety on the job site.

## OBSERVATION ELEVATOR

Mikoto observation elevator is an ideal MRL traction solutions for Malls, Hotels, premium Apartments etc. Available in a wide range of design options and finishes. Mikoto observation elevator can be customised to reflect the unique style and ambiance of your buildings.

## ESCALATORS AND MOVING WALKERS.

Escalators, travelators and moving walkways are used to raise or move people or goods from one location to another within a building or a multi-story buildings. Escalators are conveying devices that are used to move people vertically on individual, linked stairways. In installing escalators in a building, many things must be taken into consideration. The most important factors are the height to be climbed and the distance available to run the unit; since they determine the pitch and length of the escalator. Other design factors include.

## MODERNISATION

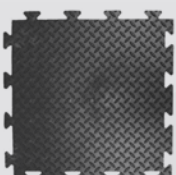

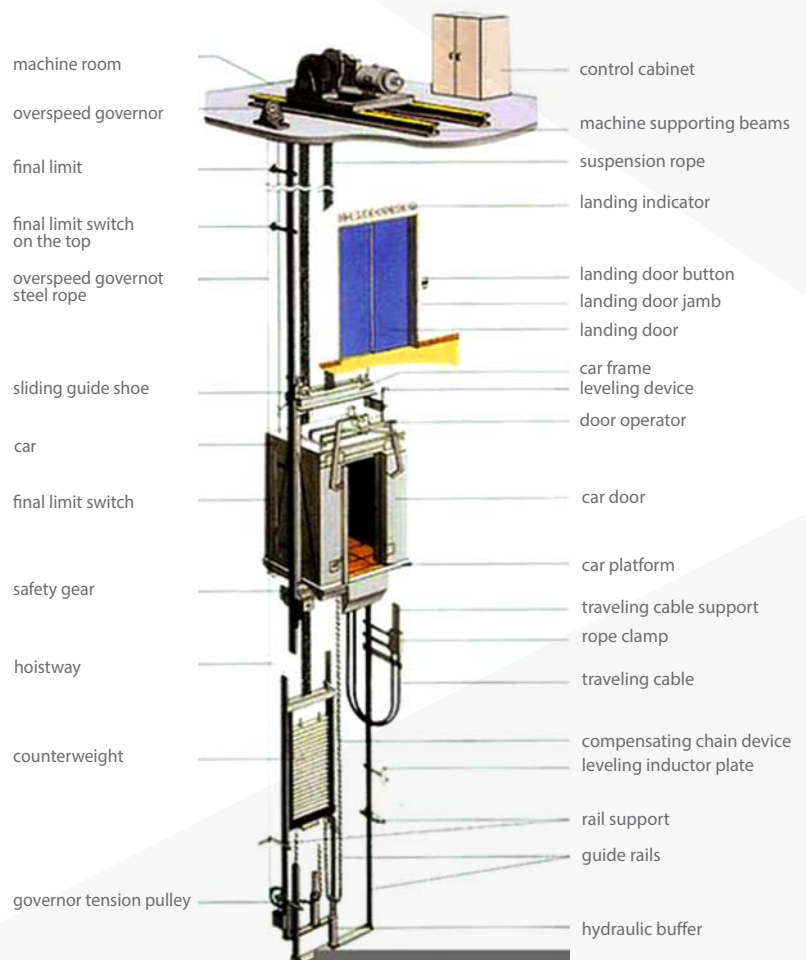

### UPGRADE AND REMODEL YOUR EXISTING ELEVATOR

Provide a better lift experience that delights instead of frustrates. Eliminate DC Generator noise for smooth and quiet rides and convert a tired old building to have a new modern feel.

Mikoto Elevators works with Non-Proprietary Design, microprocessor based elevator controls, isolation transformers, geared and gearless hoisting machines, digital drives, door operating motor, updated door equipment, new elevator car aesthetics, safety requirements, new landing and car fixtures, new LED lighting and disabled requirements.

### A NEW STANDARD IN ELEVATOR MODERNISATION

Whether four floors or forty floors, No matter who the original manufacturer was, we have a wide range of capabilities to help you bring older, inefficient systems up to today's elevator standards. We're in business to help you save money and energy, improve service, boost tenant satisfaction and ensure tenant safety.
